Professional Summary

Aspiring Data Analyst skilled in Python, SQL, Power BI, and Exploratory Data Analysis (EDA). Experienced in data preprocessing, dashboard creation, and working with large-scale datasets to derive actionable business insights. Seeking an entry-level opportunity in Data Analytics or Business Intelligence.

Education

Measi Institute of Information Technology

Aug. 2024 – May 2026

Master of Computer Applications

Chennai, Tamil Nadu

The New College

Aug. 2021 – April 2024

Bachelor of Commerce

Chennai, Tamil Nadu

Relevant Coursework

- Data Structures Algorithms SQL MongoDB Artificial Intelligence MySQL
- Computer Vision Database Management Internet of Things Computer Architecture

Projects

V Connect: Large-Scale Data Analytics Platform | Python, Pandas, Power BI, SQL

May 2025

- Processed and analyzed 650k+ village level records using Python and Pandas to extract meaningful insights.
- Performed Data Cleaning, Preprocessing and validation to improve data consistency and reporting accuracy.
- Wrote SQL queries for data extraction, filtering and joins and reporting workflows during exploratory data analysis (EDA).
- Built Power BI Dashboards for KPI tracking, reporting and business decision making.
- Automated reporting workflows to reduce manual analysis effort and improve processing efficiency.

LogiSense 360: Shipment Tracking and Analytics System | Python, Flask, SQLite, JavaScript

December 2025

- Developed a logistics and shipment tracking system with route tracking and real-time status update functionalities.
- Built admin, driver and customer dashboard modules with reporting and notification features.
- Created automated alert systems for delayed and inactive shipments using backend logic.

CyberForge: AI Portfolio and Analytics Platform | Python, Flask, SQLite, JavaScript

March 2026

- Developed a personal AI Portfolio platform to showcase analytics, automation and Python-based projects.
- Built interactive project sections with detailed descriptions, technology stacks and workflow demonstrations.
- Designed dashboard-style interfaces for displaying analytics outputs, reports and project insights.
- Implemented backend functionality using Flask and SQLite for project management and dynamic content handling.
- Integrated responsive UI components and structured navigation to improve user experience and accessibility.

Technical Skills

Languages: Python, HTML/CSS, JavaScript, SQL

Libraries: Pandas, NumPy, Matplotlib, SciPy

Data Visualization: Power BI, Tableau, Excel

Databases: MySQL, MongoDB, SQLite

Achievements

Measi Institute of Information Technology | 2025

- Secured 1st Place in Intra-College Hackathon for Developing an analytics-based project solution.

MGR University - Department of IT | 2025

- Won 2nd Prize in Inter-College Hackathon Competition.

LeetCode | 2026

- Solved 1000+ Coding problems focused on problem-solving and algorithmic thinking.
