Professional Summary

Entry-Level Data Analyst with hands-on experience in Python, SQL, Power BI, Pandas, and Excel for analyzing, transforming, and visualizing large-scale datasets. Experienced in Exploratory Data Analysis (EDA), statistical analysis, KPI reporting, dashboard development, business intelligence, business analytics, and data visualization. Built analytics solutions processing over 650,000 records while automating reporting workflows and delivering actionable insights. Strong foundation in database querying, data lifecycle management, predictive analytics, and data-driven decision making.

Technical Skills

Programming Languages: Python, SQL (Joins, CTEs, Window Functions, Subqueries, Stored Procedures, Views, Indexes, Aggregate Functions, Query Optimization), R

Data Analysis: Exploratory Data Analysis (EDA), Data Cleaning, Data Validation, Data Wrangling, Data Transformation, Statistical Analysis, Feature Engineering, Descriptive Statistics, Hypothesis Testing, Data Profiling, Outlier Detection

Business Intelligence: Power BI, Tableau, Microsoft Excel, Power Query, DAX, Data Modeling, Relationships, Measures, Calculated Columns

Machine Learning: Regression Models, Classification Models, Scikit-learn, Model Evaluation

Databases: MySQL, SQLite, MongoDB

Data Visualization: Matplotlib, Power BI, Tableau

Developer Tools: Git, GitHub, VS Code, Docker, Jupyter Notebook

Concepts: ETL, Data Warehousing, Data Modeling, Business Intelligence, Business Analytics, Data Pipelines, Data Integration, Reporting Automation, Decision Support, Data Quality, Data Governance, KPI Reporting, Trend Analysis

Experience

Data Analyst & Python Developer | Al Haseena Exports Pvt. Ltd. **Dec 2025 – Apr 2026**

[LogiSense 360](#) – Predictive Logistics Analytics Platform

Python | Flask | Scikit-learn | SQLite | MongoDB

- **Developed** a predictive logistics analytics platform using Python, Flask, Scikit-learn, SQLite, and MongoDB to automate shipment monitoring, forecast delivery delays, identify spoilage risks, and improve operational decision making through KPI dashboards.
- **Built and evaluated** regression and classification models using historical logistics data to identify operational risks, improve forecasting accuracy, perform trend analysis, and support proactive business decision-making.
- **Built** interactive dashboards and business reporting modules for admins, drivers, and customers to monitor business metrics, shipment performance, operational **KPIs**, and decision support metrics.
- **Automated** shipment monitoring via intelligent alert generation, enabling early **identification of exceptions** and high-risk shipments.

Projects

V Connect: Large Scale Data Analytics Platform | Python, Pandas, Power BI, SQL **May 2025**

- **Processed, extracted** **and transformed** over 650,000 village-level records using Python and Pandas, improving data quality, supporting data governance practices, and reducing manual preprocessing time by 70%.
- Performed **exploratory data analysis (EDA)**, trend analysis, and SQL-based analytics to uncover demographic, infrastructure, and development patterns that supported data-driven decision making and business insights.
- **Designed** interactive Power BI dashboards featuring KPI tracking, drill-down analysis, trend visualization, regional comparisons, and dynamic filtering to support business reporting and executive decision-making.
- **Reduced** manual reporting effort by approximately 70% through reporting automation and automated data processing pipelines.

CyberForge: Intelligent Knowledge Retrieval Platform | Python, Flask, SQLite, JavaScript **June 2026**

- Developed an intelligent knowledge retrieval engine that processed user queries against a structured **150-response knowledge base** containing **500+ indexed keywords per knowledge entry**.
- Designed a custom **relevance-scoring algorithm** that ranked candidate responses based on keyword matching and returned the highest-scoring result in real time.
- Integrated multilingual voice and text interaction, and intelligent autocomplete to enhance user experience and accessibility.
- Built a modular Flask application with SQLite for efficient data management, fast response retrieval, and scalable deployment.

Education

Master of Computer Applications **Jul 2024 – Apr 2026**

[Measi Institute of Information Technology](#)

Bachelor of Commerce **Aug 2021 – May 2024**

[The New College](#)

Achievements

- **1st Place** — Intra-College Hackathon, MEASI Institute of Information Technology (2025)
- **2nd Place** — Inter-College Hackathon, MGR University – Department of Information Technology (2025)
- **Solved 1,750+ coding problems** on LeetCode, strengthening algorithmic thinking and problem-solving skills.
